Experience Overview

- Highly experienced Full Stack Developer with over 12+ years of expertise in designing and deploying scalable, high-performance applications using the latest technologies and best practices.
- Proficient in the full Spring ecosystem, including **Spring Core, Spring MVC, Spring Data JPA, and Spring Security, as well as Spring Cloud** for developing robust microservices architectures.
- Extensive expertise in API development using REST, with a strong focus on ensuring system robustness and resilience through Circuit Breaker and Service Discovery patterns.
- Skilled in managing both SQL and NoSQL databases, leveraging tools like Liquibase to ensure seamless and efficient database migrations.
- Proficiency in DevOps practices, including containerization with Docker, orchestration with Kubernetes, alongside application monitoring using Grafana and the ELK Stack.
- Experienced in frontend development with ReactJS and knowledgeable in Android development, having developed dynamic and responsive user interfaces for both web and mobile platforms.
- Effective communicator with the ability to translate complex technical concepts into easily understandable terms for both technical and non-technical stakeholders, facilitating better collaboration and decision-making.

Technical Skills

Languages/Frameworks: Java, Spring Boot, ORM - Hibernate, Microservices, JavaScript, ReactJS, SQL, Postgres, Oracle DB, MongoDB, Android SDK, JUnit, Swagger UI

Technologies/Tools: Maven, Gradle, Docker, K8s, Git, Gitlab CI/CD, Jenkins

Cloud Technologies: AWS, AWS Fargate, AWS S3, AWS EBS, AWS Dynamo, Firebase, MongoDB, GCP, Google Analytics,

Developer Tools: IntelliJ IDEA, STS, VS Code, Eclipse, Android Studio

Certifications: Google Cloud Professional Data Engineer

Experience / Awards / Achievements

Dish Network Technologies — Lead Engineer May 2022 – Present

- Received the prestigious **Dish Network Technical Excellence Award** in 2024 for outstanding technological contributions, recognizing exemplary expertise and innovation in advancing Dish Network's technological capabilities.
- **Won the Dish Network Codefest 2023** for developing the Asset Management app.
- Secured **1st Runner Up** in the Dish Network Hackathon 2022 for the Employee Seat Booking app.
- Awarded the **Dish Spot Award** in 2023 for remarkable performance and impact on key projects.

MSys Technologies — Technical Architect, Technical Lead, SSE, SE Feb 2012 – May 2022

- Recognized as **Best Performer of the Year** in 2013, 2014, 2016, 2018, and 2019 for consistently achieving exceptional results. Also, received the **Blog Championship Award** in 2017 for outstanding contributions to the blogosphere.

Projects

Dish Network Technologies — Lead Engineer May 2022 - Present

My Dish App | *Java, Spring Boot, Spring Cloud - Microservices*

- Collaborated with stakeholders to gather requirements, ensuring development aligned with business needs and managed production deployments, monitoring application performance for high availability and reliability.
- Successfully migrated all microservices to Spring Boot 2.7, rewriting significant portions of the code for improved performance and maintainability.
- Conducted Snyk scans to identify and fix security vulnerabilities, enhancing the application's security posture.

Dish Paperless Agreement App | *Java, Spring Boot, Spring-Cloud Microservices*

- Rewrite whole code form Coldfusion into Spring boot to make it easily maintainable code which improves reliability of the services, fixed defects/incidents

Set-Top-Box Health App | *Java, Spring Boot, Spring Cloud Microservices*

- **Engineered** an user-friendly dashboard for real-time monitoring and analysis of Set-Top-Box payload details.
- **Developed and deployed** RESTful APIs to seamlessly capture payload data from the user interface and efficiently store it in a relational database .

In-Home-Service Catalogue App | *Kotlin, Android SDK, Google Analytics, Crashlytics*

- Achieved a **60% increase in on-tech sales**, earning appreciation from stakeholders.
- Developed an **offline mobile app** enabling content download from CMS, enhancing user accessibility and reducing data usage by **40%**.
- Structured content in **in-house CMS solution**, enabling the marketing team to easily update content without any assistance from the development team, reducing content update time by **70%**.

Shift allowance management App | *Java, Spring Boot, Next.js, PostgreSQL, Docker Compose, OpenProject, Grafana*

- Automated shift allowance calculations, significantly reducing manual errors and administrative workload.
- Improved payroll transparency and accuracy, leading to increased employee satisfaction with allowance processing.

Asset Management App | *Java, Spring Boot, Next.js, PostgreSQL, Docker Compose, Redmine, Grafana*

- Led development of an award-winning application for the operations team, recognized in a codefest event. Utilized containerization for deployment and implemented Grafana for monitoring, achieving a **70% reduction in manual effort** and **widespread adoption by DISH employees**.
- Conducted comprehensive requirement gathering from stakeholders, developed detailed low-level design documentation, and led the implementation of the entire codebase, ensuring alignment with project goals and stakeholder expectations.

Employee Seat Booking App | *Java, Spring Boot, Reactjs, Postgres, Docker-compose*

- Led the team to develop the backend using Spring Boot and Java, and skillfully designed efficient REST APIs for seamless frontend-backend interaction and optimal performance.

MSys Technologies — Technical Architect, Technical Lead, SSE, SE

Feb 2012 – May 2022

Pivot3 - Backend service | *Java, VMware SDK, Tomcat*

- Developed a comprehensive backend REST service for the Pivot3 UI plugin, and wrote extensive unit test cases to ensure the reliability and performance of the REST APIs.

Pivot3 - UI Plugin to Manage Pivot3 Volumes | *Javascript, ReactJS*

- Developed a UI plugin for managing Pivot3 volumes, providing users with a seamless and efficient interface for volume management by developing ReactJS UI components and collaborating closely with the UI/UX team.

Pivot3 - vRealize Plugin | *vRealize SDK, Java, Javascript*

- Developed a vRealize plugin for Pivot3, integrating with VMware's vRealize suite to enhance the functionality of Pivot3 products by automating the creation of batches of HCI volumes and significantly reducing manual efforts.

Nasuni - Cloud Data Storage App | *Android SDK, Java, Firebase, Google Analytics*

- Developed a cloud data storage app for Android, providing users with a reliable and secure solution for storing and managing their data.

Spree Wearables - Health Tracker Android App | *Android SDK, Java, Firebase, Google Analytics*

- Developed a feature-rich Android app for Spree Wearables, leveraging Android SDK and Java to provide users with comprehensive health tracking, real-time data synchronization using Firebase, and detailed usage analytics via Google Analytics.

Mobitaz | *Java, Android SDK, Robotium*

- Developed libraries and converted them into byte code to record UI objects for test cases and enable playback on multiple devices via USB connection or wirelessly
- Implemented an Agent app to send record events to the server and manage playback on devices.

NetApp | *Java, Selenium, TestNG, Maven*

- Developed a robust suite of automated test cases using Selenium WebDriver, TestNG, and Maven to ensure the reliability and performance of NetApp products.

Auto Configuration Server | *Java, Spring Framework, JBoss, Hibernate*

- Developed a robust REST API using Java and the Spring Framework, collaborating with the UI Flex team to ensure seamless integration and efficient communication between the backend and frontend systems.

MSys Company Website Development | *PHP, WordPress*

- Collaborated with the marketing team to create easily manageable blogs, integrated analytics plugin, and increased customer engagement by 40%.

Education

Anna University - SIT, T.N | *Bachelor of Information Technology*

Aug 2007 – May 2011

VHN School - T.N | *Bio-Maths*

Apr 2005 – May 2007
